

## FLUENCY RATE PROGRESS GRAPH

## HOW TO ADMINISTER:

You need a stop watch or timer.

## HOT READ

Choose a text that the student is currently reading and has read at least once before.

Have them read for a few minutes, then introduce the purpose of the test.

Tell the student they are not to rush, but to read with expression. You will give them any words they do not know after a 3-second pause.

Tell them to start and begin timing for one minute.

After one minute, count the words read. Deduct one point for any incorrect words or words you had to provide.

Plot the number of words on the graph.

Write the name of the book and page number:

[illegible]
